

# ENGINEERING

## Merit Badge Requirements

- 1) Select some manufactured item in your home (such as a toy or an appliance) and, under adult supervision and with the approval of your counselor, investigate how and why it works as it does. Find out what sort of engineering activities were needed to create it. Discuss with your counselor what you learned and how you got the information.
- 2) Select an engineering achievement that has had a major impact on society. Use the resources available to you to research it. Tell your counselor about the engineer(s) who made it possible, the special obstacles they had to overcome, and how this achievement has influenced the world today.
- 3) Explain the work of six types of engineers. Pick two of the six and explain how their work is related.
- 4) Visit with an engineer (who may be your counselor or parent) and do the following:
  - A) Discuss this engineer does and the tools the engineer uses.
  - B) Discuss with the engineer a current project and the engineer's particular role in it.
  - C) Find out how the engineer's work is done and how results are achieved.
  - D) Ask to see the reports that the engineer writes concerning the project.
  - E) Discuss with your counselor what you learned about engineering from this visit.
- 5) Do ONE of the following:
  - A) Use the engineering-systems approach to make step-by-step plans for your next campout. List alternative ideas on such items as program schedule, campsites, transportation, and costs. Tell why you made the choices you did and what improvements were made.
  - B) Make an original design for a piece of patrol equipment. Use the engineering systems approach to help you decide how it should work and look. Draw plans for it. Show the plans to your counselor, explain why you designed it the way you did, and explain how you would make it.
- 6) Do TWO of the following:
  - A) *Transforming Motion*. Using common material or a construction set, make a simple model that will demonstrate transforming motion. How does this make use of basic mechanical concepts like levers and inclined planes? Describe an example where this mechanism is used in a real product
  - B) *Using Electricity*. Make a list of 10 electrical appliances in your home. Find out approximately how much electricity each uses in one month. Learn how to find out the amount and cost of electricity used in your home during periods of light and heavy use. Tell five ways to conserve electricity.
  - C) *Using Materials*. Do experiments to show the differences in strength and heat conductivity in wood, plastic, and metal. Discuss with your counselor what you have learned.
  - D) *Converting Energy*. Do an experiment to show how mechanical, heat, chemical, solar, and/or electrical energy may be converted from one or more types of energy to another. Explain your results. Describe to your counselor what energy is and how energy is converted and used in your surroundings.
  - E) *Moving People*. Find out the different ways people in your community get to work. Make a study of traffic flow (number of vehicles and relative speed) in both heavy and light traffic periods. Discuss with your counselor what might be improved to make it easier for people in your community to get where they need to go.
  - F) *Science Fair*. Build an engineering project for a science or engineering fair or similar competition, and enter it. (This requirement may be met by participation on an engineering competition project team.) Discuss with your counselor what your project demonstrates and what kind of questions visitors to the fair asked you about it. How well were you able to answer their questions?
- 7) Find out what high school courses you need to take to be admitted to an engineering college. Find out what other subjects would be helpful in preparing for an engineering career.
- 8) Explain what it means for an engineer to be a registered Professional Engineer(P.E.). In what types of engineering work is registration most important?
- 9) Study the Engineer's Code of Ethics. Explain how this is like the Scout Oath and Scout Law.

Scout Name: \_\_\_\_\_ Unit #: \_\_\_\_\_ Date: \_\_\_\_\_

### Requirement 3

Explain the work of six types of engineers:

Type: \_\_\_\_\_

Description: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Type: \_\_\_\_\_

Description: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Type: \_\_\_\_\_

Description: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Type: \_\_\_\_\_

Description: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Type: \_\_\_\_\_

Description: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Type: \_\_\_\_\_

Description: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Pick two of the six and explain how their work is related.

Type: \_\_\_\_\_

Type: \_\_\_\_\_

How is their work related? \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Scout Name: \_\_\_\_\_ Unit #: \_\_\_\_\_ Date: \_\_\_\_\_

If you selected **Option B**:

Make and original design for a piece of patrol equipment. Use the engineering systems approach to help you decide how it should work and look. Draw plans for it in the space below

Show the plans to your counselor.

Explain why you designed it the way you did, and explain how you would make it: \_\_\_\_\_

---

---

---

---

---

---

---

---

**Requirement 6**

You have been given six options for this requirement. Select and complete two of them.

If you selected *Option A – Transforming Motion*:

Using common material or a construction set, make a simple model that will demonstrate transforming motion.

Describe your model: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

How does this make use of basic mechanical concepts like levers and inclined planes? \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Describe an example where this mechanism is used in a real product: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

If you selected *Option B – Using Electricity*:

Make a list of 10 electrical appliances in your home. Find out approximately how much electricity each uses in one month.

Item: _____	Approximate amount of energy used per month: _____
Item: _____	Approximate amount of energy used per month: _____
Item: _____	Approximate amount of energy used per month: _____
Item: _____	Approximate amount of energy used per month: _____
Item: _____	Approximate amount of energy used per month: _____
Item: _____	Approximate amount of energy used per month: _____
Item: _____	Approximate amount of energy used per month: _____
Item: _____	Approximate amount of energy used per month: _____
Item: _____	Approximate amount of energy used per month: _____
Item: _____	Approximate amount of energy used per month: _____

Tell how to find out the amount and cost of electricity used in your home during light and heavy use: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Tell five ways to conserve electricity:

- 1) \_\_\_\_\_
- 2) \_\_\_\_\_
- 3) \_\_\_\_\_
- 4) \_\_\_\_\_
- 5) \_\_\_\_\_

Scout Name: \_\_\_\_\_ Unit #: \_\_\_\_\_ Date: \_\_\_\_\_

If you selected **Option C – Using Materials**:

Do experiments to show the differences in strength and heat conductivity in wood, plastic, and metal. Give a brief summary of the experiments you did: \_\_\_\_\_

---

---

---

---

---

---

---

---

Discuss what you have learned: \_\_\_\_\_

---

---

---

---

---

---

---

---

If you selected **Option D – Converting Energy**:

Do an experiment to show how mechanical, heat, chemical, solar, and/or electrical energy may be converted from one or more types of energy to another. Explain your experiment and the results: \_\_\_\_\_

---

---

---

---

---

---

---

---

---

---

---

---

Describe to your counselor what energy is and how energy is converted and used in your surroundings: \_\_\_\_\_

---

---

---

---

---

---

---

---

If you selected **Option E – Moving People**:

Find out the different ways people in your community get to work: \_\_\_\_\_

---

---

---

---

---

---

---

---

Make a study of traffic flow (number of vehicles and relative speed) in both heavy and light traffic periods. Give a summary of your study: \_\_\_\_\_

---

---

---

---

---

---

---

---

Discuss what might be improved to make it easier for people in your community to get where they need to go: \_\_\_\_\_

---

---

---

---

---

---

---

---

Scout Name: \_\_\_\_\_ Unit #: \_\_\_\_\_ Date: \_\_\_\_\_

If you selected *Option F – Science Fair*:

Build an engineering project for a science or engineering fair or similar competition, and enter it. (This requirement may be met by participation on an engineering competition project team.) Tell about your project: \_\_\_\_\_

---

---

---

---

---

---

Discuss what your project demonstrates: \_\_\_\_\_

---

---

---

What kind of questions did visitors to the fair ask you about your project? \_\_\_\_\_

---

---

---

How well were you able to answer their questions? \_\_\_\_\_

---

---

---

### **Requirement 7**

Find out what high school courses you need to take to be admitted to an engineering college: \_\_\_\_\_

---

---

---

---

Find out what other subjects would be helpful in preparing for an engineering career: \_\_\_\_\_

---

---

---

---

### **Requirement 8**

Explain what it means for an engineer to be a registered Professional Engineer (P.E.): \_\_\_\_\_

---

---

---

In what types of engineering work is registration important? \_\_\_\_\_

---

---

---

### **Requirement 9**

Study the Engineer's Code of Ethics. Explain how this is like the Scout Oath and Scout Law: \_\_\_\_\_

---

---

---
